#### **BASIS FOR REJECTIONS**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

#### DRAWING OBJECTIONS

The drawings are objected to under 37 CFR 1.83(a) because they fail to show plate 11 as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the

Application/Control Number: 10/649,319

Art Unit: 3725

remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are further objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the feature where (1) the folding apparatus includes a removing means, (2) the feature where the extension means are provided on the securement means and (3) the feature of a repositioning means 36 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified

Art Unit: 3725

and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

#### REJECTION OF CLAIMS ON FORMAL MATTERS

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 2, 5, 6, 10, 12, 15 and 16 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The original disclosure does not provide any details of the "extension members" in conjunction with the folding apparatus that would clearly facilitate an understanding of this part of the invention. Accordingly, the details of the features are deemed insufficient. As to the removing means, there are no details on the construction of the moving means in conjunction with the folding apparatus. Therefore, the assembly of the moving means to the folding apparatus is found inadequate. Additionally, the "repositioning means" is not clearly shown in the drawings. This repositioning means in addition to the sliding means, as shown in figure 6, is not clear since the drawings do not adequately shown the distinction between these two mechanisms and how they accomplish their intended operation.

Application/Control Number: 10/649,319

Art Unit: 3725

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7, 8 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Failure to positively define what constitutes the "other of the first and second rotational position" renders the subject matter indefinite. Failure to provide antecedence for the "secured" and "unsecured" portion of the sheet renders the subject matter vague.

## REJECTION OF CLAIMS OVER PRIOR ART

Claims 1, 2, 4-6, 8, 9, 11, 12, 14-16, 18 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Delachartre (671,312). See the Figures where the securing means, in the form of a rotatable plate B, facilitates securement thereto in conjunction with a rotatable releasable clamp H. Handles P and pivot members attached between the securing means B and base C permit folding of the sheet material x. The extension members are shown at I, I'. By slidably rotating the clamp, the clamp is slidably moved away from the "folded portion" and can be repositioned. Figure 4 shows where there is means for creasing the folded portion. Since the workpiece has no structural effect on the apparatus, the claimed apparatus features are met by Delachartre. See Figures 4 or 6 where the clamp is repositioned on the folded portion of the sheet material and further pressed to crease the folded portion. In a claim drawn to a process of making a sheet material of electrode sheet (claim 19), the intended use must result in a

Art Unit: 3725

manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

Claims 3 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Delachartre (671,312) in view of Takeuchi (4,594,868). Delachartre illustrates the claimed invention as treated supra but does not provide the securing means with a vacuum plate to further secure the sheet material thereto. This is a common provision within the bending brake art as evidenced by Takeuchi where the sheet material can be held in place by vacuum to appropriately retain the sheet material against the base and securing means. Accordingly, it would have been obvious to the skilled artisan at the time of the invention to have modified Delachartre's folding apparatus by further providing a vacuum feature to the securing means using the concepts taught by Takeuchi so as to further facilitate attachment of the

# INDICATION OF ALLOWABLE SUBJECT MATTTER

Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

## PRIOR ART CITED BY EXAMINER

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Application/Control Number: 10/649,319

Art Unit: 3725

**RESPONSE BY APPLICANT(S)** 

Applicant(s) response to be fully responsive and to provide for a clear record must

specifically point out how the language of the claims patentably distinguishes them from the

references, both those references applied in the objections and rejections and those references

cited in view of the state of the art in accordance with 37 CFR 1.111 (a), (b) and (c).

**INQUIRIES** 

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Examiner D. Crane whose telephone number is (571) 272-4516.

The examiner's office hours are 6:30AM-5:00PM, Tuesday through Friday.

Documents related to the instant application may be submitted directly to Group 3700 by

facsimile transmission at all times. Applicant(s) is(are) reminded to clearly mark any

transmission as "DRAFT" if it is not to be considered as an official response. The Group 3725

Facsimile Center number is (703) 872-9306.
